EXPERIENCE

Freelance, USA – *Conversational AI Designer*

JULY 2024 – SEPT 2024

Evaluation and optimization of chatbots in the mental health, automotive, and banking sectors, aimed at enhancing end-user interactions and improving satisfaction and conversion metrics.

- **UX Design:** Conducted research, benchmark studies, user interviews, surveys, and persona definition to inform chatbot development.
- **Conversational Design:** Redesigned conversational flows to improve information architecture, developed error-handling mechanisms, and created prototypes for testing.
- **LLM Implementation:** Assessed feasibility of GenAI integration where it best suited the use cases, optimizing technology deployment.
- **Prompt Engineering:** Developed customized system prompts to drive bot performance and analyze user interactions effectively.

Santex, USA/Argentina (Remote) – *Conversational AI Designer*

MAR 2023 – JULY 2024

Led the successful migration of a chatbot from DialogFlow to a one powered by a Large Language Model (LLM), overseeing the entire product lifecycle, including design, testing, implementation, and post-launch optimization.

- **Redesigned Conversational Flows:** Developed detailed flow maps to sequence interactions, ensuring a smooth and intuitive user experience optimized for LLM technology.
- **Voice and Tone Design:** Crafted the bot's personality and tone of voice, aligning it closely with the brand's identity to enhance user engagement.
- **System Prompt Development:** Developed and refined prompts that define the LLM's behavior, ensuring consistency in its responses and personality.
- **Error Handling:** Implemented robust fallback mechanisms, enhancing the chatbot's resilience and user satisfaction.
- **Data Preparation and Model Training:** Prepared data and trained the model to optimize its performance, resulting in more accurate and context-aware interactions.
- **Testing and Validation:** Established comprehensive methodologies for LLM chatbot evaluation, including test sets and evaluation guides.
- **Data Analysis:** Analyzed chatbot usage data using Excel and Python to drive continuous improvement.
- **Documentation:** Authored technical documentation and user guides for ongoing maintenance.

Key Achievements:

- Increase in Lead Generation: Tripled lead generation through chatbot redesign.
- Bounce Rate Reduction: Lowered bounce rate to 25%.
- Maintained <10% Error Rate: The Virtual Assistant successfully answered more than 90% of the users' requests.
- Successfully revamped the virtual assistant powered by ChatGPT, establishing a systematic approach adaptable to various use cases.

The process is way more detailed [here](#) and [here too](#).

Espressive, USA (Remote) – *Sr Conversational AI Analyst – Partner Success*

OCTOBER 2021 – OCTOBER 2023

- Streamlined help desk processes by analyzing interaction data, training the bot model, and updating content.
- Managed bot implementation from User Acceptance Testing (UAT) to product launch, ensuring smooth deployment.
- Facilitated communication between stakeholders, tech teams, and customers to maintain project alignment.

Key Achievements:

- 7-10% Increase in Deflection Rates: Improved help desk efficiency.
- Maintained <10% Error Rate: Ensured seamless user experiences.
- Developed comprehensive documentation that enhanced support and streamlined processes.
- Conducted introductory Python workshops, enhancing colleagues' understanding of Python implementations within the product.
- Promoted from Conversational AI Analyst to Sr. Conversational AI Analyst – Partner Success due to exceptional performance and skills.

Auronix, Mexico – *Conversational Designer*

MAY 2021 – SEPTEMBER 2021

Responsible for the complete design and implementation of conversational experiences for a diverse range of clients and industries. Combined both creative and technical aspects, ensuring that the solutions delivered were not only user-friendly but also technically sound.

- Analyzed business needs and conducted user research to inform bot design.
- Developed the bot's voice and tone, ensuring alignment with brand identity.
- Defined use cases and designed conversational flows, user journey maps, fallback mechanisms, and identified intents and entities.
- Managed technical integrations with databases and APIs to ensure seamless functionality and accurate conversational flow design.
- Built and deployed bots using the company's internal platform.

Key Achievements:

- Workshop Facilitation: Led workshops on bot persona creation and conversational design.

- Guideline Creation: Developed standardized design guidelines to improve team efficiency.
- Conducted technical workshops to minimize design-to-development issues.

Freelance, Remote – *Conversational Solutions Consultant*

JULY 2021 – PRESENT

- Specialization in Platform-Centric Design: Focused on tailoring chatbots and voice interfaces to optimize user engagement through platform-centric conversation design.
- UX Research & Persona Development: Conducted extensive UX research to craft bot personas and develop detailed conversation flow diagrams, ensuring compelling and effective conversational experiences.
- Expertise in Development Tools: Proficient in developing chatbots, voice, and multimodal interfaces using tools like Alexa Dev Console and DialogFlow.
- API REST Implementations: Skilled in implementing API REST solutions for conversational interfaces, utilizing programming languages like Python and JavaScript.

Pefai, Mexico – *Front-end Developer*

DECEMBER 2019 – MAY 2021

- Developed a SaaS product, starting from its inaugural version and guiding its evolution into a modern iteration.
- Utilized technologies like JavaScript, TypeScript, CSS, HTML, and GitHub for front-end development.
- Contributed to the adoption of React, Node, and Emotion, enhancing performance and scalability.

VOLUNTEER EXPERIENCE

Women in Voice – *Mexican Chapter Ambassador*

2023 – PRESENT

- Organize networking events and online platforms for discussions and support.
- Lead workshops, webinars, and mentorship programs, focusing on education and empowerment in STEM for girls.
- Advocate for diversity and inclusion, securing partnerships for support.

Mentoring – *Conversational Solutions consultancy*

2022 – PRESENT

- Conduct introductory workshops on conversational design for women's community.
- Deliver presentations on career prospects within the conversational design industry.
- Offer guidance and consultations for conversational design projects.
- ADP List mentoring sessions.

EDUCATION

BEDU – *Data Analysis*

JANUARY 2021 – JULY 2021, Mexico City

Laboratoria – *Front-end Developer*

JUNE 2019 – DECEMBER 2019, Mexico City

Universidad Autónoma Metropolitana – *Bachelor of Arts in Linguistics*

2010 – 2024, Mexico City

津田塾大学 Tsuda University – *International and cultural studies*

2014 – 2015, Tokyo
